From New York Times bestselling and award-winning author Jewell Parker Rhodes comes a heartbreaking and uplifting tale of survival in the face of Hurricane Katrina. Twelve-year-old Laneshia lives in a tight-knit community in New Orleans' Ninth Ward. She doesn't have a fancy house like her uptown family or lots of friends like the other kids on her street. But what she does have is Mama Ya-Ya, her fiercely loving caretaker, wise in the ways of

the world and able to predict the future. So when Mama Ya-Ya's visions show a powerful hurricane--Katrina--fast approaching, it's up to Laneshia to call upon the hope and strength Mama Ya-Ya has given her to help them both survive the storm. From the New York Times bestselling author of *Ghost Boys* and *Towers Falling*, *Ninth Ward* is a deeply emotional story about transformation and a celebration of resilience, friendship, and family--as only love can define it. A dozen essays from a July 1994 conference at the University of San Marino argue that a total shift to electronic information media would trigger wrenching social and cultural dislocations. Among their perspectives are the pragmatics of the new, farewell to the information age, toward meta-reading, hypertext and authorship, and the body of the text. They avoid the usual fetish arguments such as curling up in bed or leather bindings and pipes. Novelist Umberto Eco provides an afterward. No index or word search. Annotation copyright by Book

News, Inc., Portland, OR Don't let an introduction to research methods be your students' least favorite (and most intimidating) political science course. Relevant, timely, insightful, comprehensive, and always mindful of their student audience, the authors have revamped their popular text so that the sixth edition is friendlier and more intuitive than ever—the perfect gateway to understanding not just the "how" but also the "why" behind research into politics. Covering the discipline's major methods, the authors lead students step-by-step through the logic of research design. "Building block" chapters on hypothesis formation and testing, variables, and measurement are right up front; the introduction to research design, sampling, and literature reviews now come with more explanation as to why a researcher would pursue different kinds of methods; the stats chapters begin with a common-sense primer that walks students through foundational ideas and practices. Throughout the text, updated

examples of contemporary research problems keep readers engaged. Each chapter has bolded key terms that are also listed in a glossary at the end of each chapter and the end of the text. "Helpful hints" feature boxes give students nuts-and-bolts reminders they can refer to when they conduct their own research or assess the work of others. NEW TO THIS EDITION New examples of political science research in Chapter 1, including a case on judicial decision making and current research into public opinion on the war in Iraq. Expanded discussion of theory in Chapter 2, showing how competing paradigms can be applied to the same topic of study. Substantially updated discussion of survey research including coverage of Internet polling and a fuller description of interviewing. Computational formulas and calculations are now featured in "How It's Done" boxes allowing students to separate lengthy calculations from substantive discussion of the meaning or interpretation of statistical results. Greater

coverage of newer developments in applied statistics, including exploratory data analysis and descriptive and inferential statistics for counts and functions of counts. In general, less emphasis on computation, and more on interpretation. Reorganized statistics chapters for better comprehension with regression analysis and logistic regression in their own chapters. A new overview of statistical analysis, including discussion of data preparation, description, modeling, inference, interpretation, and the communication of results.
