You Can't Say That! Do you have a right to be offended by the facts? Against all the evidence, the mainstream media insist that America has never been more racist and sexist. The police are waging a war on Black people. "White privilege" means minorities never get a fair shake. Although this narrative of oppression is demonstrably fictitious, it is taboo to question it, and those who do so risk being labeled racist or sexist themselves. America needs an honest conversation based on common sense and cold, hard facts. Honesty and respect for the facts are the specialty of Wilfred Reilly, the celebrated author of Hate Crime Hoax. In Taboo, he fearlessly examines ten forbidden truths that have been buried by political correctness. They include: -The Black rate of violent crime is roughly 2.5 times the white rate. When demographic variables are taken into account, there are no racial differences in the rate of police-involved shootings. -Interracial crime is remarkably rare, but 75 to 80 percent of it occurs against white people. -Minorities can be racist—take the Nation of Islam, which holds that white people are an inferior race created by a Black scientist. -Disparities between racial groups in IQ testing and SAT performance are the result of cultural variables, such as the presence of a father in the home, not racism. Reilly goes where most social scientists fear to tread, using objective statistics and common sense to tackle taboo topics. Taboo is an essential takedown of the lies you hear every day from ideological activists and lazy, biased media. This timely book examines the role of fact-checking journalism within political policy debates, and its potential contribution to public engagement. Understanding facts not to operate in a political vacuum, the book argues for a wide remit for fact-checking journalism beyond empirically-checkable facts, to include the causal relationships and predictions that form part of wider political arguments and are central to electoral pledges. Whilst these statements cannot be proven or disproven, fact-checking can, and sometimes does, ask pertinent critical questions about the premises of those claims and arguments. The analysis centres on the three dedicated national British fact-checkers during the UK's 2017 snap general election, including their activity and engagement on Twitter. The book also makes a close political discourse and argumentation analysis of three key issue debates in flagship reporting from Channel 4 News and the BBC.
